Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 16-23, 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaufmann et al for the reasons set forth in the previous Office action.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 24 and 41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaufmann et al in view of Horvath et al for the reasons set forth in the previous Office action in the rejection of claim 24.

Allowable Subject Matter

5. Claims 26-32, 35-40 are allowed.

Response to Arguments

6. Applicant's arguments filed 3/4/04 have been fully considered but they are not persuasive as to the patentability of claims 16-25 and 41. Applicant continues to argue, re claim 16, that the clamp of Kaufmann et al does not meet the terms of the claim and specifically that the bottom

portion of the clamp structure is missing, and that the clamp includes metal parts. However, both Kaufmann et al and applicant use C-shaped clamps made of plastic. There is no bottom part of the clamp of Kaufmann et al because it is C-shaped—it fits over the rail of the yarn machine and is clamped thereto by a set screw as is applicant's device. Furthermore the "contact block 7" referred to in the instructions for operating the device of Kaufmann is the electrical connection between the feeder and the yarn machine, similar to the members 69, 70 of applicant's device, and as old and well known in the art as can be seen in some of the other cited patents.
